Profile Summary

B.Tech Computer Science graduate with 6 months of AI/ML internship experience, specializing in Python, machine learning, deep learning, and AWS cloud technologies. Hands-on experience developing AI-powered solutions in medical imaging, NLP, and automation, from data preprocessing to deployment. Passionate about building scalable, intelligent applications that solve real-world problems.

Skills

Technical Skills: Python, C,C++,Java, JavaScript, HTML, CSS, Machine Learning, Deep Learning (CNN),Django

Cloud & Backend: AWS Lambda, API Gateway, DynamoDB, Firebase, REST APIs

Tools: Git, GitHub, Hugging Face, Phaser 3, UI/UX Design

Soft Skills: Communication, Teamwork, Problem Solving, Time Management, Adaptability

Experience

Software Developer Engineer — NarrowLabs Pvt. Ltd. — Apr 2025 – Nov 2025

- Developed cloud-based applications using AWS Lambda, API Gateway, and DynamoDB.
- Implemented scalable serverless functions and integrated cloud APIs.
- Led UI/UX design for the *KADHI* website and collaborated on responsive front-end development.
- Leading Phaser.js game development for the movie *SAHASAM*, focusing on game logic, animations, and real-time API integration.

Projects

Breast Cancer Detection Using ML & DL — Python, TensorFlow, CNN, ResNet-18, EfficientNet-B0

- Developed and evaluated deep learning models for breast cancer classification using medical imaging datasets and transfer learning techniques.
- Implemented end-to-end data preprocessing, augmentation, feature extraction, and model evaluation pipelines using industry-standard metrics.
- Leveraged ResNet-18 and EfficientNet-B0 architectures with ImageNet pre-trained weights to improve classification performance.
- Applied GradCAM-based Explainable AI (XAI) techniques to visualize model predictions and enhance interpretability for clinical analysis.

Double Bell – Smart Public Bus Application — Flutter, Firebase, AI Chatbot

- Developed a smart transportation platform for real-time bus scheduling.
- Integrated an AI-powered chatbot to handle route queries, stop information, and passenger assistance services.

- Implemented secure digital ticket booking, payment processing, and passenger notification systems.
- Designed analytics dashboards for revenue, expenses, and operational performance monitoring for bus operators.

SAHASAM – Cloud-Backed Browser Game — Phaser 3, AWS Lambda, DynamoDB

- Developed an interactive 2D browser-based game featuring puzzle-solving mechanics, animations, and story-driven gameplay.
- Integrated AWS Lambda and DynamoDB to implement cloud saves, real-time leaderboard management, and scalable backend services.
- Designed REST API workflows for player progress tracking and analytics collection using serverless cloud architecture.
- Optimized game performance and user experience through efficient event handling.

Handwritten Notes Generator — Python, Pillow, PDF Processing, Image Rendering

- Developed a document rendering system that converts digital text into realistic handwritten-style notes using custom handwriting fonts and image-processing techniques.
- Implemented automated text formatting, line wrapping and page segmentation.
- Built PDF and image export pipelines to generate handwritten assignments, notes, and educational content.
- Designed handwriting styles and page layouts to improve output quality and user experience.

Certifications

- Google Cloud – Generative AI for Healthcare
- Kaggle – Machine Learning
- NPTEL – Python for Data Science
- HackerRank – Python Programming
- Dubai Future Foundation – Prompt Engineering
- Google Developer Program – Skill Badges and Learning Achievements
- Brototype Campus Community – Certificate of Completion
- AINCAT 2026 – Certificate of Participation (Rank: 16113)

Education

B.Tech — University College of Engineering, Thodupuzha (cgpa-7.63)

Higher Secondary Education — St. Aloysius HSS, Thrissur(94%)

Achievements

- Robotics Club Convenor – Developed leadership and teamwork skills through robotics projects.
- Best Student Award – Brototype (Outstanding performance and dedication).

Languages

English, Malayalam, Tamil, Hindi, Sanskrit
